

Natural Resources

A Special Project of the South Dakota FFA Foundation

Important Note: Please thoroughly read the General Rules at the beginning of this handbook for complete rules and procedures that are relevant to all South Dakota FFA Career Development Events.

Purpose

The purpose of the Natural Resources Career Development Event is to foster student interest, promote environmental and natural resource instruction in the agricultural education curriculum, and provide recognition for those who have demonstrated skills and competencies as a result of environmental and natural resource instruction. Environmental and natural resource education has a responsibility to educate the public and prepare students to enter career in the environmental and natural resource industry.

Objectives

- Identify common insects, birds, mammals, fish, and trees and shrubs of South Dakota.
- Understand the biological and scientific principles of soils, forestry, recycling, land management, energy resources, outdoor recreation, wildlife management, water resources management, wildlife habitats, and air resource management.
- Utilize different resources to answer problem-solving questions.

Event Rules

Each team will be comprised of three or four members.

The top three individual scores will be used to determine the final team score.

Event Format

The Natural Resources CDE will consist of a written test, a problem-solving activity, and the identification of 10 specimens within each of six different groups.

Written Test – 200 points

The written test will consist of 50 multiple-choice questions.

Each question will be worth four points.

One hour will be allowed to complete the written portion of the test.

The written test questions will be taken from the 5th edition of the test *Managing Our Natural Resources*, and will consist of questions from each of the following areas:

Air Resource Management	Recycling
Energy Resources	Soils
Forestry	Water Resources Management
Land Management	Wildlife Habitats
Outdoor Recreation	Wildlife Management

Problem Solving Activity – 100 points

The problem-solving activity will be taken from the *Managing Our Natural Resources* text and its workbook, the *South Dakota Hunting and Trapping Handbook*, and the *South Dakota Fishing Handbook*.

The problem-solving portion will consist of 10 multiple-choice questions. Each question will be worth 10 points.

This phase will be limited to 30 minutes.

The problems will be selected from one or more of the following areas:

Conservation	Shelter Belt Management
Ecosystem	Soils
Energy	Upland Game
Fish	Vegetation Cover
Habitat	Water Pollution
Hunter Ethics	Wildlife Carrying Capacity
Population Dynamics	Wildlife Management
Recreation on Public Lands	Woodland Management

Identification – 600 points

Identification will consist of ten adult specimens in each of these six groups:

- insects
- waterfowl and upland game birds
- other birds
- mammals
- fish
- trees and shrubs

All specimens will be relative to South Dakota and must be adult specimens, as listed in the rules.

Specimens must not be handled by participants unless protected in tubes or boxes. If very small insects are used, they may be mounted under a binocular microscope.

All specimens will be represented by at least 5"x7" photographs. Study specimens may be used in addition to the photographs.

All birds in Group II will be males.

Twelve minutes will be allowed to identify specimens in each of the six groups.

Scoring

	Points Possible
Identification (10 points per specimen, 60 problems)	600
Written Test (50 questions, 4 points per question)	200
Problem Solving Activities(10 points per question, 10 questions)	100
Total Possible Individual Score	900
Total Possible Team Score (3 participants)	2700

Tiebreakers

In the case of a team tie, the order to break the tie will be:

1. Total Written Test Score
2. Total Problem Solving Score

In the case of an individual tie, the order to break the tie will be:

1. Individual Written Test Score
2. Individual Written Identification Score
